

1. Use Case: Cancel an Order

Goal: To cancel an order after it has been placed.

Actor: Customer.

Description:

The customer decides to cancel an order after it has been placed due to reasons such as a change in preference or an error in the order.

Main Flow:

- 1-The customer logs into their account.
- 2-They navigate to the "Orders"
- 3-The customer selects the order they wish to cancel.
- 4-They click the "Cancel Order" button.
- 5-A confirmation message appears asking the customer to confirm the cancellation.
- 6-The customer clicks "Confirm Cancellation."
- 7-A notification appears confirming that the order has been canceled successfully.

Preconditions:

- 1-The customer must be logged into their account.
- 2-The order must be in "Processing" or "Not Shipped" stat.

Postconditions:

- 1-The order is canceled, and the order status is updated in the system.

Use Case: Return an Order

Goal: To return a product purchased in an order.

Actor: Customer.

Description:

The customer wants to return a product they purchased in an order for various reasons like defective items or changing their mind.

Main Flow:

- 1-The customer logs into their account.
- 2-They navigate to the "Orders" section.
- 3-The customer selects the order that contains the product they want to return.
- 4-They click the "Return Product" button.
- 5-The customer selects the reason for the return from the available options (e.g., defective, unwanted, etc.).
- 6-The return request is submitted for review.
- 7-The customer receives a confirmation that the return is being processed.
- 8-The customer ships the product back using the provided return shipping method.

Preconditions:

The customer must be logged into their account.

The product must be eligible for return based on the site's return policy.

Postconditions:

The product is returned, and the refund process is initiated.

Use Case: Download Invoice

Goal: To download an invoice for an order.

Actor: Customer

Description:

The customer wants to download the invoice for an order they have placed for review or financial records.

Main Flow:

- 1-The customer logs into their account.
- 2-They navigate to the "Orders" section.
- 3-The customer selects the order for which they want to download the invoice.
- 4-They click the "Download Invoice" button.
- 5-The invoice is downloaded in PDF format.

Alternative Flows:

If the invoice is not yet available:

A notification appears informing the customer that the invoice has not been generated yet.

Preconditions:

The customer must be logged into their account.

The order must have been paid successfully.

Postconditions:

The invoice is downloaded successfully in PDF format.
